*** ANNOUNCEMENT ***

--File 515 D&B Dun's Electronic Business Directory is now online completely updated and redesigned. For details, see HELP NEWS F515.

--File 990 - NewsRoom now contains May 2002 to present records.
File 993 - NewsRoom archive contains 2002 records from January 2002-April 2002. To search all 2002 records, BEGIN 990,993 or B NEWS2002.

--Alerts have been enhanced to allow a single Alert profile to be stored and run against multiple files. Duplicate removal is available across files and for up to 12 months. The Alert may be run according to the file's update frequency or according to a custom calendar-based schedule. There are no additional prices for these enhanced features. See HELP ALERT for more information.

--U.S. Patents Fulltext (File 654) has been redesigned with new search and display features. See HELP NEWS 654 for information.

--Connect Time joins DialUnits as pricing options on Dialog. See HELP CONNECT for information.

--CLAIMS/US Patents (Files 340,341, 942) have been enhanced with both application and grant publication level in a single record. See HELP NEWS 340 for information.

--SourceOne patents are now delivered to your email inbox as PDF replacing TIFF delivery. See HELP SOURCE1 for more information.

--Important news for public and academic libraries. See HELP LIBRARY for more information.

--Important Notice to Freelance Authors--
See HELP FREELANCE for more information

For information about the access to file 43 please see Help News43.

FUTURE Web. (Internet/Web/Online Service Information)

Gowan, Michael

PC World, 19, 4, 105

April, 2001

ISSN: 0737-8939

LANGUAGE: English

RECORD TYPE: Fulltext; Abstract

WORD COUNT: 4961

LINE COUNT: 00372

ABSTRACT: An overview of Web services and the future direction of the
Internet is presented. Online shopping grew explosively in the late 1990s,
but the bubble burst in 2000 with overinflated stock prices dropping and

venture capitalists withholding cash. Sites that had flourished became overextended and ran out of money. The resulting shakeout has led to consolidation as startups disappear and specialized businesses are acquired by larger, established firms seeking to diversify. Pure-play E-tailers are losing ground to 'click and mortar' companies adding Internet shopping services to their traditional stores. Customers can still expect good buys but not massive discounts. The Internet is also causing products such as software to evolve into services; users will obtain entertainment through subscription-based downloading and get software through application service providers (ASP). Personable.com is a good example of an ASP targeting small and home businesses. More and more future Web connections will be through fixed- **wireless** services and handheld **wireless** devices. Specialized applications are augmenting Web browsers.

Top 10 Wireless Internet.(Internet/Web/Online Service Information)
Jerome, Marty
Ziff Davis Smart Business for the New Economy, 56
Jan 1, 2001
LANGUAGE: English RECORD TYPE: Fulltext; Abstract
WORD COUNT: 4046 LINE COUNT: 00317

ABSTRACT: Ten myths and fallacies about the future of the **wireless** Internet are discussed. Many people, including marketers, mistakenly believe that **wireless** access will provide everything already available on the Web and more. Hundreds of new services are coming to market, of which the best work with GSM phones and local city guides, but it does not make sense for the average business to squeeze its Web page onto a tiny cellular screen. Content alone will not drive **wireless** -Internet demand. Sites that emphasize slick content for competitive advantages are those that will have the most difficulty fitting the technology into a pocket. **Wireless** content must be brief, easy to use and cheap. Pricing for **wireless** access is not going to rapidly plummet; the big slump in cell-phone access fees has already happened, and cost cutting is no longer an option for most providers. Connecting to the **wireless** Internet can still be difficult and error-prone, and access remains slow. **Wireless** Application Protocol (WAP) Is touted as a PC-killer but can work only with the simplest interfaces. It is still difficult even to check E-mail on most **wireless** devices. Telecom giants do not yet own the entire **wireless** Web, although leading provider Verizon has gained a head start through mergers. The **wireless** Web is still not a smart investment for most corporations, but companies nevertheless cannot afford to ignore it.

ABSTRACT: 1997 marked the first producer price decline in 11 years for finished energy goods and foods. The core index for finished goods other than food and energy remained stable. Indexes for transportation equipment and paper products also declined, while those for tobacco products, alcohol and pharmaceuticals saw an increase. Services in general also showed increases.

Jan, 1995
ISSN: 0098-1818 LANGUAGE: English RECORD TYPE: Fulltext; Abstract
WORD COUNT: 21624 LINE COUNT: 01877

ABSTRACT: Labor contracts for 42% of all unionized workers in the private and public sector will either expire or reopen in 1995, which makes for a full collective bargaining schedule. The biggest concern will be job security, and secondary issues will be health care, pensions and skills training. Changes in wages, compensation, cost-of-living-adjustments and lump-sum payments are discussed. Collective bargaining issues in specific industries and different state and local government jurisdictions are presented.

ABSTRACT: The effective use of technology can help companies respond to market demands more quickly and effectively, which results in greater success. Companies first need to find untapped markets by researching the competition in public databases and by visiting competitors' Web sites. Companies also need to promote their offerings effectively via marketing videos, fax broadcasting, interactive presentations on CD or by hosting an online forum, newsgroup or chat session. Customer responses generated by these methods should be promptly answered. Customers should also have no difficulty accessing a company, which may require the installation of a voice-mail service, multiple mailboxes or the use of pagers. Companies should advertise actively with full-page ads in trade publications, large ads in the yellow pages and by placing an ad at a Web site prospects are likely to frequent.

ABSTRACT: One hundred of the best World Wide Web sites are listed with brief descriptions. The sites are divided into such categories as Computer Resources, Internet Resources, Commerce and Marketing, News and Sports, Government and Politics, Reference, Education and Careers, E-Zines, Art and Music and After Hours. Sites are listed alphabetically within each category. Software for using the Web itself can be obtained from sites run by Netscape, Sun Microsystems and several others. Apple, Microsoft, Intel and DEC are among the leading computer technology vendors with Web sites. Other information available on the Web includes data on choosing a college or obtaining a college loan, an electronic version of London's Daily Telegraph, and several electronic magazines. The After Hours category includes entertainment and gaming sites.

Language: English Record Type: Fulltext

Document Type: Magazine/Journal; Trade

Word Count: 833

TEXT:

NEW YORK - Interactive kiosks and " **wireless store** " equipment, two futuristic technologies, were among the newer retail technology products manufacturers featured at the Business and Equipment Expo held as part of the annual National Retail Federation convention.

A few products, in fact, were being piloted by retailers prior to their introduction at the exposition.

The NRF, meanwhile, began offering a new member service, SpecNet, a telephone program supplied by MCI Telecommunications Corp. It provides discounts ranging to 30% to retailers that use any of these MCI services: MCI Vnet, MCI Vision, MCI 800 and/or MCI Private Line. The program includes a 6% cash refund from NRF based on total net monthly telephone volume, with additional discounts available based on large volume usage and term commitments.

More than three dozen retailers already have signed up for SpecNet, including Lechters, NHD Stores, S&K Famous Brands and Oshman's Sporting Goods.

A rundown of the exposition's technology developments includes the following:

Interactive kiosks. IBM and Siemens Nixdorf demonstrated terminals that were already being tested or deployed by retailers.

Kmart was testing five kiosks from IBM (and its partner DCI Marketing) in three Detroit stores (see story page 2) as information terminals. One of Kmart's objectives was to see if the kiosks improve customer service and thereby boost sales.

Two retailers are using Siemens Nixdorf's kiosks for different applications. Lechmere has purchased 14 terminals as Lechmere Express Self-Service Centers, through which customers **order** and **pay** for merchandise, retrieving the goods at the **store** 's **pickup** desk. Montgomery Ward is testing Ward Service Express **credit** kiosks in six stores. Shoppers can obtain **credit** information and make payments through the terminals.

Wireless store . Symbol Technologies, Telxon and Teklogix introduced new radio frequency devices, expanding retailers' options in choosing mobile equipment that can communicate within a **store** using RF technology, rather than using hard-wired terminals.

Symbol and Telxon each showed full-function, portable POS terminals which include magnetic stripe **credit** card readers and receipt printers. The RF units allow salesclerks to process a sale anywhere in a **store** .

Symbol's 2-lb. unit has a built-in scanner and removable hand-held scanner/RF terminal that communicates on the vendor's Spectrum One RF network. Separately, Symbol has issued a 30-page booklet, **The Wireless Store** , The Strategic Environment for Retailing's Future.

Telxon's POS-5000 POSX-press terminal includes a touch screen menu display with an electronic signature capture feature for **credit** sales. It uses an add-on scanner and communicates over narrow-band and spread-spectrum networks.

Teklogix's two devices are an RF network controller with up to seven channels, each able to communicate with a host of equipment, and a small, 1.7-lb. hand-held RF terminal for warehouse and inventory management applications.

Multimedia communication system. VF Corp., an apparel manufacturer, has developed MRIS (Market Response Information System) that uses video

conferencing technology and computers and information software from IBM for real-time transmission of live-action video and graphic data between the vendor and retailers.

VF said many retailers were interested in the technology and it was discussing installing MRIS with a number of customers.

Point-Of-Sale systems. Hewlett-Packard and Fujitsu Systems of America are integrating the HP 9000 Series 800 in- **store** processor with FSA's Atrium9000 POS line to provide an open-architecture UNIX-based POS system. The two vendors are jointly marketing and supporting the combined system. The agreement is part of HP's drive expanding its OpenSTORE **store** automation technology.

On its own, HP announced support of IBM's industry-standard Token Ring networking protocol, providing integration of all HP RISC-based with IBM's local-area network technology. HP already supports the two other LANs, FDDI and Ethernet/802.3.

VeriFone introduced Gemstore Diamond Retailer that integrates a POS registers, electronic funds transfer terminal and printer into one system tailored for small chains. The system also generates a variety of sales and financial reports.

Scanners. This POS equipment, now de rigueur for all retailers, continues to be refined, with Welch Allyn introducing Scanteam 3000, a hand-held scanner based on solid state CDD imaging technology that can be operated either automatically, motion activated or manual triggered.

Taking a different tack, NCR debuted the 7890 Presentation Scanner, a hands-free upright reader with a dense laser scanning pattern that doesn't require positioning or orienting of merchandise for scanning. The portable scanner can be positioned in a variety of way.

Security tags. Security Tag Systems has developed J Tag as an anti-shoplifting device for costume jewelry and Inktags and Inkmates as apparel EAS (Electronic Article Surveillance) tags that break and spread two dyes if forceable removed. The two security systems are removed at the point-of-sale with detachers.

3M has shrunk the size of its 1-inch square QuadraTag price/security marker to .6 inches by .94 inches, making it the smallest combination price tag and security marker on the market. The tags now can be printed in a **store** using any number of off-the-shelf terminal transfer printers.

Video service. Muzak introduced ZTV's Retail Channel, a combination of music videos, fashion, sports, cartoons and lifestyle shorts. Five separate programs are available for different demographic groups.

Paris for dieters

Nannery, Matt

Chain Store Age v78n6 PP: 79-82 Jun 2002 ISSN: 1087-0601 JRNL CODE:
CSA

WORD COUNT: 1997

ABSTRACT: Despite what the press is saying about IT budgets being up, by the end of the year, you will see that retailers spent less than last year, Carrefour CIO Jeremy Hollows told retailers at the recent Global Retail Technology Forum in Paris. Many budget-conscious retail CIOs did tighten their belts this year, but Germany's Metro, Chile's HomeCenter Sodimac and America's Gap continue to spend heavily on IT.

Tips for tech tools

McCarthy, Ed

Journal of Financial Planning v14n3 PP: 56-57 Mar 2001 ISSN: 1040-3981

JRNL CODE: JFN

WORD COUNT: 1220

ABSTRACT: In late November and early December, there seemed to be an unusual number of print and TV ads popping up for cell phone services and personal digital assistants (PDA). This was interesting because just a few years ago these technologies appealed primarily to leading edge adopters, typically hard-core technogeeks and business users with deep pockets. Today, manufacturers aim both technologies squarely at the mass market. A cell phone service consists of three elements: 1. signal coverage, 2. price plan, and 3. the handset. Some factors to consider when buying a PDA are discussed.

Riding the air waves

Garry, Michael

Progressive Grocer v73n7 PP: 104-106 Jul 1994 ISSN: 0033-0787

JRNL CODE: PGR

WORD COUNT: 1646

ABSTRACT: In the future, wireless radio frequency (RF) communications will extend to such applications as point-of-sale (POS) registers, time clocks, scales, and electronic shelf tags. Such applications will disseminate data by means of invisible radio waves, rather than through wires or cables. To get to that future, grocers first have to grapple with the networks that carry RF signals between computers and tools like hand-held terminals.

There are basically 2 options: traditional narrow band networks and the newer spread spectrum networks. In the industry, narrow band is more entrenched, but spread spectrum is gaining rapidly. Spread spectrum does not offer as much power or operating range as narrow band, which can cover a store with one base station. However, spread spectrum, with its large bandwidth, can process more data at faster speeds than narrow band.

The wireless store
Anonymous
Chain Store Age Executive v69n11 (Section 1) PP: 49-57 Nov 1993 ISSN:
0193-1199 JRNL CODE: CSA
WORD COUNT: 3801

ABSTRACT: Recently, the potential of radio frequency (RF) in data communications has begun to be fully appreciated by retailers. Many leading chains, including Wal-Mart, K mart, and Saks Fifth Avenue, are now interested not so much in particular RF applications as in developing a seamless in-store architecture that is built around RF. A **wireless store** is their ultimate goal. Wireless data communications works much like any other RF technology. However, instead of music or words, it is data that is transmitted. Most often, the device which transmits the data is a handheld computer. There are, essentially, 2 types of handhelds: intelligent terminals and dumb terminals. Two basic types of RF technologies are available: narrow band and broad spectrum. Retailers wanting to go wireless must take steps in their in-store networking to make it adhere as closely as possible to industry standards. Applications for wireless stores include stock inquiries, order entry, and price verification. The most compelling rationale for creating a **wireless store** is flexibility. James E. Traxler of Telxon suggests that the return on investment will be radically different, depending on the strategy and applications intended.

Spread Spectrum: Kmart Installs Wireless RF Network
Robins, Gary
Stores v73n11 PP: 76, 78 Nov 1991 ISSN: 0039-1867 JRNL CODE: STR
WORD COUNT: 1057

ABSTRACT: A wireless radio frequency (RF) network called Spectrum One now operates in 700 K mart stores and will be installed in all the company's US

stores by 1992. Spectrum One is Symbol Technologies' implementation of spread spectrum technology; it offers the ability to support a larger number of data collection devices and the ability to transmit data at much greater speeds. At K mart, Spectrum One's current applications include price verification and inventory ordering, balancing, and counting.

Symbol is beta testing at retail sites an add-on, printed-circuit board that will convert cabled point-of-sale (POS) devices into wireless POS devices that will communicate over Spectrum One. Tests are expected to run through the end of 1991, but K mart is not one of the test sites.

Technology Becomes a Partner

Anonymous

Discount Merchandiser v31n10 PP: 18-19 Oct 1991 ISSN: 0012-3579

JRNL CODE: DMD

WORD COUNT: 1392

ABSTRACT: The whole nature of the partnership between retailers and their technology suppliers is based on 2 facts: 1. The technology being provided is perceived by retail customers as genuinely strategic. 2. Technology is not stable, and it changes so rapidly that a premium is placed on staying close to new developments, and when possible, getting ahead of them. At Symbol Technologies, one way partnership interaction takes place is through "scanning in the 90s" sessions, discussions held with major retail customers and prospects about 100 times a year. The 2nd feedback vehicle that Symbol uses with partners is the user group, whose centerpiece is the annual user's group conference.

POS & MIS: A Supplier Perspective

Rouland, Renee Covino

Discount Merchandiser v31n7 PP: 38-43, 66 Jul 1991 ISSN: 0012-3579

JRNL CODE: DMD

WORD COUNT: 5238

ABSTRACT: A forum of supplier experts discussed the development of information technology, such as management information systems (MIS) and point of sale (POS) scanning, in the discount retail areas. Kevin Murphy, senior vice-president of corporate marketing at Fujitsu Systems of America, said that retailers are requesting more sophisticated computer capability in individual departments within a store. Judy Murrah, senior marketing manager at GM Symbol Technologies Inc., said the choice in scanning technology is now so broad that retailers will tend to pilot-test several types of scanners, get opinions from associates, and focus on what technology is best for them. According to Leon N. Morsillo, vice-president of marketing at Datacap System Inc., retailers are beginning to demand more functionality from POS terminal systems.

RECORD TYPE: FULLTEXT; ABSTRACT

WORD COUNT: 3053

LINE COUNT: 00247

ABSTRACT: Wireless networks are appealing, but currently the wireless network market is not growing as fast as it could. One reason for the lack of expansion is that many wireless networks are very slow, while others are priced too high. In addition, many wireless networks depend on proprietary technology, and there is a lack of standards governing wireless technology. However, demand for wireless networks is poised to increase due to the influx of handheld computers and scanners. In addition, the growth in popularity of pen-based, palmtop and laptop computers is spurring demand for wireless networks. Some industry analysts predict that wireless networks may soon make up eight to ten percent of all local area network connections.

RECORD TYPE: FULLTEXT; ABSTRACT

WORD COUNT: 1847

LINE COUNT: 00149

ABSTRACT: Supermarkets can use wireless local area networks over narrow band or spread spectrum radio frequencies. Narrow band networks operate on a single FCC-licensed radio frequency of about 459 MHz, whereas spread spectrum networks operate on frequencies ranging from 902 and 928 MHz and do not require licensing. Narrow band is widely used by stores and can be operated over a larger distance than spread spectrum. However, network response time is much faster with spread spectrum frequencies. Both network systems cost between \$7,000-\$8,000 per store.

Murrah, Judy

Chain Store Age Executive with Shopping Center Age, v69, n4, p76(1)

April, 1993

ISSN: 0193-1199

LANGUAGE: ENGLISH

RECORD TYPE: FULLTEXT; ABSTRACT

WORD COUNT: 757

LINE COUNT: 00064

ABSTRACT: The benefits that retailers derive from wireless technology are discussed. A **wireless store** is a sales environment wherein traditional cable-bound connections among point-of-sale terminals, data-collection devices and host computers are substituted with high-speed radio frequency communication networks. Retailers benefit from wireless technology through express service, reserve to the rescue, more personalized service, instant reorder, easy markdowns, increased receiving staff efficiency and improved efficiency and productivity.

ABSTRACT: K Mart Corp has installed **Symbol** Technologies Inc's Spectrum One wireless communication networks in half of its 2,383 stores. The remaining discount operations will receive the data communication system in the next five months of 1992. The Triad Systems database for automotive parts, prices and labor estimating costs will be available to all 991 automobile service centers by the end of 1992. K Mart's PACE Warehouse Membership Inc stores will begin to use in Jul 1992 the J.D. Edwards' financial and job cost computer software to monitor the construction of 28 new warehouse operations in 1992.

**Affordable Telecommunications Technology Announces a New Capitalization
Structure for the Company**
PR NEWSWIRE (US)
July 19, 2002
JOURNAL CODE: WPRU LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 380

Affordable Telecommunications Technology Corp. , an emerging provider
and marketer of wireless telecommunications products and services,
announced today that it has received the required votes to implement a 50
to 1 reverse stock split.

The Board of Directors, and the Company's key management team feel
that this is a necessary step in order to better control the Company's
capitalization structure. Effective today, the Company is trading under the
symbol of ATTG with a new CUSIP number 00826N4088.

**Triversity Partners with Symbol Technologies to Deliver Mobile POS
Solution**
PR NEWSWIRE
February 04, 2002
JOURNAL CODE: WPRW LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 685

Triversity Inc., a leading software provider delivering integrated
multi-channel, customer-centric solutions for the retail industry, today
announced an agreement with Symbol Technologies Inc., a global leader in
mobile data transaction systems, to develop a new class of mobile POS
(Point-of-Sale) solutions that allows retailers to scan merchandise,
process credit cards and print receipts from anywhere in the store using
Symbol handheld or wireless devices. Triversity's mobile POS solution,
Transactionware Mobile, incorporates Symbol Spectrum24(R) integrated
wireless LAN connectivity (802.11b) across the Symbol line of Microsoft
DOS, Pocket PC and Palm O/S handheld computers. Triversity is currently
demonstrating Transactionware Mobile, in addition to its newly-launched
Transactionware Enterprise, a revolutionary J2EE-based transaction
processing solution, at the Food Marketing Institute's (FMI)
MARKETECHNICS(R) 2002 show (February 3-5, 2002) at the San Diego Convention
Center in San Diego, California (booth 1905).

Retailers can move more customers through the point of sale at a
faster rate with the mobile POS register. Not only can long lines at the
cash register be reduced during peak times, but sales associates can offer
customers a personalized, escorted shopping experience. Triversity's mobile
POS solution will interface seamlessly with the store's POS system,
providing sales associates with immediate access to customer information
and inventory - without leaving the sales floor. Triversity's mobile POS is
poised to bring new levels of customer satisfaction and loyalty to any
retail business.

InPhonic, Sallie Mae Team to Offer Wireless Solutions To Seven Million Student-Loan Borrowers

PR NEWSWIRE

January 07, 2002

JOURNAL CODE: WPRW LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 728

InPhonic Inc., a leading wireless solutions provider, today announced an agreement with Sallie Mae, the nation's premier provider of education funding, to offer wireless phones and service plans to Sallie Mae's more than seven million customers.

Under the agreement, InPhonic will operate and manage an online **wireless store** featured on Sallie Mae's popular shopping and personal finance Web site, SUCCESS(SM) by Sallie Mae. The online store, powered by InPhonic, lets Sallie Mae customers research and buy mobile phones and service plans from the leading manufacturers and wireless carriers. Visitors to the **wireless store** are offered a free Internet-ready phone after choosing a calling plan tailored to their geographic location and anticipated calling patterns.

AT&T Wireless Launches Personalized 'One-to-One' Information Services; Talk to the Internet with Voice-based Internet Browsing powered by Tellme

PR NEWSWIRE

June 12, 2001

JOURNAL CODE: WPRW LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 746

REDMOND, Wash., June 12 /PRNewswire/ -- Beginning today, more than 15 million AT&T Wireless customers can have conversations with the Internet. AT&T Wireless introduces AT&T Wireless #121 service powered by Tellme, providing customers personalized "one-to-one" information on demand, simply by talking into their phone.

AT&T Wireless #121 service allows customers to use their voice to access a variety of useful and innovative Internet-based information services like driving directions, movie listings, stock quotes, news updates, weather, or even scheduling a morning wake up call while within the AT&T Wireless network. For no additional charge beyond standard usage fees, AT&T Wireless #121 Service gives all AT&T Wireless customers the ability to hear the information they want, when and where they need it. Customers simply dial "#121" from any AT&T Wireless phone and browse through the voice menu just as they would a typical Internet menu. There is nothing for customers to set up or activate.

Office Depot Announces Second Quarter 2000 Results; Company -2-

BUSINESS WIRE

July 12, 2000

JOURNAL CODE: WBWE LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 1056

One of the more significant factors impacting our second half outlook is our revised pricing strategy for paper, ink and toner cartridges. In an effort to better compete with non-traditional office supply retailers in these high demand categories, we have lowered our prices, changed item packaging and increased promotional activity of these key commodity items. These new pricing and promotional strategies are designed to gain market share and customer loyalty across all sales channels.

In terms of our longer-term prospects, we continue to believe that we have all the critical pieces in place to grow both our domestic and international businesses profitably for many years to come. Some of our challenges in the second quarter were timing issues, such as the delay in enjoying the benefits of our cost reduction initiatives in the warehousing and distribution area. We fully expect to realize these benefits, just not as early as we originally expected. Moreover, we are very encouraged at our continued dominance in the Internet segment of our industry, and we feel that our prospects for International growth are excellent. In short, we are highly optimistic about our future."

Affordable Telecommunications Technology Corporation Announces that Form 10-SB Registration Statement Ready to be Declared Effective

BUSINESS WIRE

January 03, 2000

JOURNAL CODE: WBWE LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 299

HOUSTON--(BUSINESS WIRE)--Jan. 3, 2000--Affordable Telecommunications Technology Corporation (Pink Sheets:ATTP) today announced that the Securities and Exchange Commission has authorized ATTP to request effectiveness of its Form 10-SB registration, and the company will become fully reporting under the Securities Exchange Act of 1934, in about

mid-January.

Immediately following the effective date of its registration, the company's shares should begin trading under the symbol "ATTP" on the Nasdaq OTC Bulletin Board. The company's president and CEO, Steven H. Bethke, stated that, "The commencement of trading of our shares on the OTC Bulletin Board should permit the company to continue with its aggressive pursuit of mergers and acquisitions, both within its existing market in Houston, South Texas and Louisiana and other major metropolitan areas."

TEXT:

NEW YORK - Interactive kiosks and " wireless store " equipment, two futuristic technologies, were among the newer retail technology products manufacturers featured at the Business and Equipment Expo held as part of the annual National Retail Federation convention.

A few products, in fact, were being piloted by retailers prior to their introduction at the exposition.

The NRF, meanwhile, began offering a new member service, SpecNet, a telephone program supplied by MCI Telecommunications Corp. It provides discounts ranging to 30% to retailers that use any of these MCI services: MCI Vnet, MCI Vision, MCI 800 and/or MCI Private Line. The program includes a 6% cash refund from NRF based on total net monthly telephone volume, with additional discounts available based on large volume usage and term commitments.

More than three dozen retailers already have signed up for SpecNet, including Lechters, NHD Stores, S&K Famous Brands and Oshman's Sporting Goods.

A rundown of the exposition's technology developments includes the following:

Interactive kiosks. IBM and Siemens Nixdorf demonstrated terminals that were already being tested or deployed by retailers.

Kmart was testing five kiosks from IBM (and its partner DCI Marketing) in three Detroit stores (see story page 2) as information terminals. One of Kmart's objectives was to see if the kiosks improve customer service and thereby boost sales.

Two retailers are using Siemens Nixdorf's kiosks for different applications. Lechmere has purchased 14 terminals as Lechmere Express Self-Service Centers, through which customers order and pay for merchandise, retrieving the goods at the store's pickup desk. Montgomery Ward is testing Ward Service Express credit kiosks in six stores. Shoppers can obtain credit information and make payments through the terminals.

Wireless store. Symbol Technologies, Telxon and Teklogix introduced new radio frequency devices, expanding retailers' options in choosing mobile equipment that can communicate within a store using RF technology, rather than using hard-wired terminals.

Symbol and Telxon each showed full-function, portable POS terminals which include magnetic stripe credit card readers and receipt printers. The RF units allow salesclerks to process a sale anywhere in a store.

Symbol's 2-lb. unit has a built-in scanner and removable hand-held scanner/RF terminal that communicates on the vendor's Spectrum One RF network. Separately, Symbol has issued a 30-page booklet, The Wireless Store, The Strategic Environment for Retailing's Future.

Telxon's POS-5000 POSX-press terminal includes a touch screen menu display with an electronic signature capture feature for credit sales. It uses an add-on scanner and communicates over narrow-band and spread-spectrum networks.

Teklogix's two devices are an RF network controller with up to seven channels, each able to communicate with a host of equipment, and a small, 1.7-lb. hand-held RF terminal for warehouse and inventory management applications.

Multimedia communication system. VF Corp., an apparel manufacturer, has developed MRIS (Market Response Information System) that uses video conferencing technology and computers and information software from IBM for real-time transmission of live-action video and graphic data between the

.. vendor and retailers.

VF said many retailers were interested in the technology and it was discussing installing MRIS with a number of customers.

Point-Of-Sale systems. Hewlett-Packard and Fujitsu Systems of America are integrating the HP 9000 Series 800 in- **store** processor with FSA's Atrium9000 POS line to provide an open-architecture UNIX-based POS system. The two vendors are jointly marketing and supporting the combined system. The agreement is part of HP's drive expanding its OpenSTORE **store** automation technology.

On its own, HP announced support of IBM's industry-standard Token Ring networking protocol, providing integration of all HP RISC-based with IBM's local-area network technology. HP already supports the two other LANs, FDDI and Ethernet/802.3.

VeriFone introduced Gemstore Diamond Retailer that integrates a POS registers, electronic funds transfer terminal and printer into one system tailored for small chains. The system also generates a variety of sales and financial reports.

Scanners. This POS equipment, now de rigueur for all retailers, continues to be refined, with Welch Allyn introducing Scanteam 3000, a hand-held scanner based on solid state CDD imaging technology that can be operated either automatically, motion activated or manual triggered.

Taking a different tack, NCR debuted the 7890 Presentation Scanner, a hands-free upright reader with a dense laser scanning pattern that doesn't require positioning or orienting of merchandise for scanning. The portable scanner can be positioned in a variety of way.

Security tags. Security Tag Systems has developed J Tag as an anti-shoplifting device for costume jewelry and Inktags and Inkmates as apparel EAS (Electronic Article Surveillance) tags that break and spread two dyes if forceable removed. The two security systems are removed at the point-of-sale with detachers.

3M has shrunk the size of its 1-inch square QuadraTag price/security marker to .6 inches by .94 inches, making it the smallest combination price tag and security marker on the market. The tags now can be printed in a **store** using any number of off-the-shelf terminal transfer printers.

Video service. Muzak introduced ZTV's Retail Channel, a combination of music videos, fashion, sports, cartoons and lifestyle shorts. Five separate programs are available for different demographic groups.
